

I CLAIM:

1. An ice cube tray comprising a base and a plurality of containers, wherein  
said base made of inflexible material and having a plurality of cavities, each  
cavity being hollow and having a connecting edge at a circumferential  
5 bottom edge thereof;  
said containers made of flexible material, each container having a  
connecting edge at a circumferential top edge thereof, corresponding to  
said connecting edge of each cavity.
2. The ice cube tray, as recited in claim 1, wherein said connecting edge of  
10 each cavity and said connecting edge of each container are in a step design.
